Mr. Ken Paulsen
AMAX
1707 Cole Boulevard
Golden, Colorado 80401-3293

Dear Mr. Paulsen:

As you requested, enclosed is the sampling plan and the metallurgical test work plan for the pre-design activities that are currently being conducted at the Cherokee County site. The enclosed draft plans were approved as submitted and are incorporated into the April 1987 Quality Assurance Project Plan and Standard Operating Procedures (QAPP/SOP). The April 1987 QAPP/SOP was previously submitted to AMAX. The QAPP/SOP was designed and written so that its sections could be easily revised as needed. Therefore, the enclosed revision consists only of those pages of the original QAPP/SOP that have been revised. The revised text has been underlined to facilitate your review.

As we have discussed, a technical meeting between the Cherokee County PRPs and the Environmental Protection Agency (EPA) is scheduled for June 20 and 21 in Galena, Kansas, at the Municipal Building. I would like to discuss the public health endangerment issues during the afternoon of June 20 and review EPA's and AMAX's cost estimates in detail during the morning of June 21. Since this is a technical meeting, none of the PRP or government attorneys will be in attendance at the meeting. Technical staff from both Missouri and Kansas will be invited. I understand you will coordinate the participation by the PRPs.

If I can be of any assistance prior to the meeting, please contact me at (913) 236-2856.

Sincerely yours,

Alice C. Fuerst
